Materials: Screened bole chips: woodchips shall be selected hardwood species, no poplar, basswood, willow or softwood will be considered. Chips shall be chipped from bole logs, or slabs, with or without bark, with a rotary chipper, screened to 1-1/2", and oversized chips re-chipped. Chips shall be provided which conform to moisture content requirements and are free of dirt, rocks, twigs, sticks, sawdust and/or leaves. Unacceptable chips will be rejected by the state and replaced by the contractor at no cost to the state.

Moisture Content: The price quoted shall be based on net tons at 40% moisture content +/- 5%. The Vermont Department of Buildings and General Services personnel will also check the moisture content using the following procedure; two samples from each delivery van will be weighed before and after complete drying in a microwave oven.

Price Quoted: The price quoted shall include all transportation charges fully prepaid to the delivery location, and will be based upon the delivery slips, and adjusted for moisture content if the actual is less than 25% or more than 45%. For example a 23 ton load at 55% moisture will be billed at 20.7 tons (45%-55%=10% 23x10%=-2.3 23-2.3=20.7).

Chips: Chips are to be delivered to the designated area at the contractor's expense between the hours listed and will be unloaded by the contractor. Deliveries will be requested approximately one (1) week in advance of need. Delivery date and time should be cleared with the contacts listed. Deliveries will be made upon the request of our heating plant supervisor or his designee.
